MCB6937 Computational Genomics and Epigenomics
Spring 2024 – 3 credits

Class Location: This course and all class materials (e.g. lecture podcasts, discussion papers, quizzes, assignments, exams, and final project) are available online through the Canvas course website (see below).

Instructor Information
Dr. Meixia Zhao
Room 1006, Microbiology & Cell Science
Phone: 352-273-3715
Email: meixiazhao@ufl.edu
Office Hours: Mondays & Wednesdays 5:00 pm - 6:00 pm or by appointment.

Course Description
Genomics and epigenomics utilize high-throughput sequencing technologies in understanding biology questions. The primary goal of this course is to introduce history, theory, latest advances, and computational approaches in (epi)genomics for conducting large-scale genomic analyses. Course topics include sequence alignment, genome assembly and annotation, variant identification, transcriptomics, small RNAs, DNA methylation, histone modification, open chromatin region, and 3D chromatin interaction.

Course Objectives
After successful completion of this course, students should be able to:
• use basic command skills in UNIX.
• show mastery of the fundamental concepts and methodology of genomics and epigenomics.
• recognize and differentiate the advantages and disadvantages of different computational approaches and methods.
• employ and compare the computational approaches and methods in analyzing different types of high-throughput genomic data.
• interpret data generated by different computational approaches and methods.

Course Website
Login available through Canvas https://elearning.ufl.edu/

Course Prerequisite
None. Many of the computational tools we will use are installed on the HiPerGator supercomputers. Every student will be provided with user accounts on the HiPerGator UNIX server. Access to the course UNIX server is required to complete the laboratory exercises and assignments.

Important Dates
• Midterm Exam: Feb 22-25, 2024, Thursday – Sunday.
• Final Exam: Apr 27-30, 2024, Saturday – Tuesday.

Textbook Information
Textbook is not required. Prior to each class, PDF and other relevant documents will be curated and accessible online. In addition, supplementary handouts will be furnished for your review. Students are also required to read the research articles pertinent to the subjects, which will be posted on the course website.
Here are some recommended textbooks that could prove beneficial or engaging:

**Week 1:**

**Week 2:**

**Week 4:**

**Week 5:**

**Week 6-8:**

**Week 11:**

**Week 12:**

Week 14:

**Grades and Grade Points:**
For information on current UF policies for assigning grade points, see [https://catalog.ufl.edu/UGRD/academic-regulations/grades-grading-policies/](https://catalog.ufl.edu/UGRD/academic-regulations/grades-grading-policies/).

The overall course is based on 1000 points.

• **Weekly or biweekly quizzes (100 points, 10% of final grade):** There will be a weekly or biweekly quiz that needs to be completed on the Canvas course website. These quizzes are designed to enhance your comprehension of lectures and course materials.

• **Literature reading and discussion (50 points, 5% of final grade):** Research articles will be assigned for reading. Each assigned paper requires a concise report (<300 words). We will discuss these papers in the Discussions section within Canvas.

• **Assignments after class (400 points, 40% of final grade):** Regular post-class assignments will be provided. Late submissions will incur a 5% penalty per day. These assignments aim to reinforce your practice of computational approaches covered in lectures.

• **Final project (150 points, 15% of final grade):** There will be a final project at the last quarter of the semester. This project component is to give you practice in applying computational methods to address problems in biology. It can relate to the independent research or any topics of interest. Students are required to design, develop, and conduct the project using the computational approaches learned in this course. Projects can be conducted individually or in groups (up to 4 members). You will submit the final project report in the format of a professional publication, including Abstract, Introduction, Results, Discussion, Methods, and References. If working in a group, each member's contributions should be clearly outlined in an "Author Contributions" section. Draft submission is due by March 31, and the final paper must be submitted by April 28.

• **Midterm (120 points, 12%) and final exam (180 points, 18% of final grade):** Both exams will solely cover material presented during class, assessing your grasp of basic concepts and techniques in computational genomics and epigenomics.

**Submission Methods:** You need to submit your assignment through our class Canvas website.

### Attendance and Make-Up Work
Requirements for class attendance and make-up exams, assignments and other work are consistent with university policies that can be found at: [https://catalog.ufl.edu/UGRD/academic-regulations/attendance-policies/](https://catalog.ufl.edu/UGRD/academic-regulations/attendance-policies/).

### Tentative Course Schedule

</table>
| Week 7-9 | Feb 19-Mar 8 | **RNA-sequencing and differentially expressed genes:**  
1. RNA-seq experimental design  
2. RNA-seq reads quality control, trimming, mapping, and qualification (FASTQC, Trimmomatic, HISAT2, and HTSeq)  
3. Identification of differentially expressed genes (DESeq2)  
4. R and RStudio  
5. Gene ontology (GO) analysis  
6. Clustering (Heatmap, K means, and others) |
| Quiz 5  
Assignment 3, due at 11:59 PM Mar 10  
Assignment 4, due at 11:59 PM Mar 17 |
| Week 10 | Mar 11-15 | **Single-cell RNA-seq:**  
1. Single cell RNA-seq technologies  
2. Preprocessing and quality control  
3. Read alignment and quantification  
4. Dimension reduction and visualization  
5. Clustering and annotation  
6. Single cell RNA-seq data analysis (Seurat) |
| Quiz 6  
Assignment 5, due at 11:59 PM Mar 31 |
| Week 11 | Mar 18-22 | No classes, spring break. |
| Week 12 | Mar 25-29 | **Small RNAs:**  
1. Biogenesis and function of small RNAs (microRNAs, small interfering RNAs, and piwi-interacting RNA)  
2. Small RNA identification and analyses  
3. Target site prediction of small RNAs  
4. bedtools |
| Quiz 7  
Assignment 6, due at 11:59 PM Apr 7 |
| Week 13 | Apr 1-5 | **DNA methylation in plants and animals:**  
1. DNA methylation (Initiation and maintenance of DNA methylation)  
2. Techniques to measure DNA methylation  
3. Identification of differentially methylated regions (DMRs)  
4. Integrative analysis of DEGs, small RNAs and DMRs |
| Quiz 8  
Assignment 7, due at 11:59 PM Apr 14 |
| Week 14 | Apr 8-12 | **Histone modification:**  
1. Chromosome structure and histone tail modifications  
2. Histone marks (H3K9me2, H3K27me3, H3K4me3, etc.)  
3. ChIP-seq principles and analysis (MACS2, IDR, and IGV) |
| Quiz 9  
Assignment 8, due at 11:59 PM Apr 21 |
| Week 15 | Apr 15-19 | **Chromatin interaction:**  
1. Chromatin accessibility (DNase-seq, ATAC-seq including single-cell ATAC-seq, and MNase-seq)  
2. 3D chromatin interaction (HiC, chromatin loops, topologically associating domains, A/B compartments, chromosome territories, and HiC-Pro analysis) |
| Quiz 10 |
| Week 16 | Apr 22-26 | **Final project, review, and discussion** |
| Final project due at 11:59 PM Apr 28 |
| Apr 27-30 | Final exam |

**Note:** Exact schedule may be changed based on the progress of the class.

**Online Course Evaluation Process**  
Student assessment of instruction is an important part of efforts to improve teaching and learning. At the end of the semester, students are expected to provide feedback on the quality
of instruction in this course using a standard set of university and college criteria. Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Guidance on how to give feedback in a professional and respectful manner is available at: https://gatorevals.aa.ufl.edu/students/. Students will be notified when the evaluation period opens and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via https://ufl.bluera.com/ufl/. Summaries of course evaluation results are available to students at: https://gatorevals.aa.ufl.edu/public-results/.

**Academic Honesty**

As a student at the University of Florida, you have committed yourself to uphold the Honor Code, which includes the following pledge: "*We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honesty and integrity.*" You are expected to exhibit behavior consistent with this commitment to the UF academic community, and on all work submitted for credit at the University of Florida, the following pledge is either required or implied: "*On my honor, I have neither given nor received unauthorized aid in doing this assignment.*"

It is assumed that you will complete all work independently in each course unless the instructor provides explicit permission for you to collaborate on course tasks (e.g. assignments, papers, quizzes, exams). Furthermore, as part of your obligation to uphold the Honor Code, you should report any condition that facilitates academic misconduct to appropriate personnel. It is your individual responsibility to know and comply with all university policies and procedures regarding academic integrity and the Student Honor Code. Violations of the Honor Code at the University of Florida will not be tolerated. Violations will be reported to the Dean of Students Office for consideration of disciplinary action. For more information regarding the Student Honor Code, please see: http://www.dso.ufl.edu/sccr/process/student-conduct-honor-code.

**Software Use**

All faculty, staff and students of the university are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against university policies and rules, disciplinary action will be taken as appropriate.

**Services for Students with Disabilities**

The Disability Resource Center coordinates the needed accommodations of students with disabilities. This includes registering disabilities, recommending academic accommodations within the classroom, accessing special adaptive computer equipment, providing interpretation services and mediating faculty-student disability related issues. Students requesting classroom accommodation must first register with the Dean of Students Office. The Dean of Students Office will provide documentation to the student who must then provide this documentation to the instructor when requesting accommodation.

0001 Reid Hall, 352-392-8565, www.dso.ufl.edu/drc/

**Campus Helping Resources**

Students experiencing crises or personal problems that interfere with their general well-being are encouraged to utilize the university’s counseling resources. The Counseling & Wellness Center provides confidential counseling services at no cost for currently enrolled students. Resources are available on campus for students having personal problems or lacking clear career or academic goals, which interfere with their academic performance.
