**Course Description**
This 2-credit graduate course covers the genetics and physiology underlying microbial multicellular behavior, with an emphasis on bacterial examples relevant to human health and disease.

**Course Delivery**
All course content is delivered through the Canvas course website. This course is taught online and consists of asynchronous lectures, weekly quizzes, a journal club presentation, and journal-club style discussion board activities. Lectures are pre-recorded and posted to our Canvas course website. Live online review meetings will be held on zoom prior to each exam. Attendance to these live online meetings is optional, these meetings will also be recorded and posted to our Canvas course page.

- Students will be informed at the beginning of each class which portion(s) (if any) will be recorded. Students who participate with their camera engaged or utilize a profile image agree to have their video or image recorded.
- If you are not willing to consent to have your voice recorded during class, you will need to keep your mute button activated and should communicate using the "chat" feature, which allows students to type questions and comments live.
- Weekly Zoom office hours and any other one-on-one meetings with students will never be recorded.
- As in all courses, unauthorized recording and unauthorized sharing of recorded materials is prohibited.

**Course Pre-Requisites / Co-Requisites**
Completion of MCB 5205 or equivalent is recommended prior to taking this course.

**Course Objectives**
At the end of this course, students should be able to:
1. Describe specific examples of bacterial multicellular/community behavior (quorum sensing, biofilm formation, competence development, fruiting body formation).
2. Understand the altruistic principles of bacterial persister cell formation and fratricide.
3. Relate objectives 1-2 to the ability of bacterial pathogens to cause disease and resist environmental and antibiotic stress.
4. Interpret data and identify key findings presented in peer-reviewed research articles related to objectives 1-3 above.
5. Evaluate the rigor of data presented in peer-reviewed research articles related to objectives 1-4 above.

**Materials and Supply Fees** - not applicable

**Required Textbooks and Software** - no textbook required
Weekly lecture topics/readings:

Week 1, May 13-17: Introduction to multicellular behavior in bacteria, Sample journal club presentation

Week 2, May 20-24: Quorum sensing, How to choose a paper for journal club presentation
https://doi.org/10.1073/pnas.95.12.7046

Week 3, May 28-May 31: Subpopulation behavior I: the persister cell hypothesis

Week 4, June 3-7: Subpopulation behavior II: fratricide/competence development **Paper choice/approval due this week
https://www.nature.com/articles/nrmicro1613
https://doi.org/10.1111/j.1365-2958.2005.05021.x

Week 5, June 10-14: Introduction to biofilms
https://www.nature.com/articles/s41522-021-00251-2

Week 6, June 17 – 21: Posting and Peer Assessment of Journal Club Presentations

Week 7, June 24-28: no class (summer break)

Week 8, July 1-5: Prototype medical biofilm: Pseudomonas aeruginosa
https://doi.org/10.1111/j.1365-2958.2005.05008.x

Week 9, July 8-12: Prototype medical biofilm: Staphylococcus aureus
https://doi.org/10.4049/jimmunol.1002794

Week 10, July 15-19: Prototype mixed-species medical biofilm: Dental plaque
https://doi.org/10.1073/pnas.1522149113

Week 11, July 22-26: Fruiting body formation
https://doi.org/10.1073/pnas.191384198

Week 12, July 29-Aug 2: Bacterial predation

Week 13, Aug 5-9: Review and Final Exam

Attendance Policy, Class Expectations, and Make-Up Policy
Written participation in the weekly discussion boards is required (see evaluation of grades below). Excused absences for missed exams must be consistent with university policies in the Graduate Catalog and require appropriate documentation. Attendance and make-up requirements for assignments are consistent with university policies (Attendance Policies).

Evaluation of Grades
Weekly quizzes: There will be 10 weekly online quizzes, based on the weekly lecture material and/or posted readings. Each quiz is worth 4 points and will typically consist of multiple-choice questions. These are open-book
quizzes (administered through Canvas) that are meant to help you review the course material and practice for the exams. For study purposes, answers to quiz questions will be available in Canvas following each quiz due date.

CANVAS HINTS for ONLINE QUIZ AND ASSIGNMENT SUBMISSION (provided by UF Computing Help Desk): It is recommended that you take online assessments during Help Desk hours whenever possible. If you have a problem while taking an Assessment, log out and log back in as quickly as possible. If the assessment is timed, the timer will continue to run while you are logged out. If you still encounter difficulties, take a screen shot of the problem (Hit the “Print Scrn” button on your keyboard and paste “CTRL+V” into a program like Word or Paint) so the Help Desk can investigate, and you will have “proof of technical difficulty” of the problem for your Instructor. Call the Help Desk (352-392-4357) immediately. When you submit an Assignment/Assessment you get a confirmation screen that contains a confirmation number. You might want to make a habit of taking a screen shot or printing it for your records. The Assignment/Assessment list will also show this Assignment/Assessment as "submitted" including the date and time of your submission. If you do not get the confirmation screen and your Assignment/Assessment is not listed as "submitted," you have not submitted the Assignment.

Discussion board activities: There will be 10 graded discussion board activities (1 per week); these will be based on assigned weekly readings of peer-reviewed research articles that complement the weekly lecture material. These activities are in a journal club style, meant to be interactive, facilitating conversational interaction between students and instructor and focused on critical evaluation of the assigned research article. For some weekly discussions students may be assigned into groups. A rubric for these activities will be provided in Canvas. Each discussion board activity is worth 10 points.

Journal club-style presentation: Each student will prepare a 20–30-minute journal club style presentation that will be shared with the class for peer review (see weekly schedule for when these should be ready for posting). More details and a rubric will be provided during the first week of class. The overall grade for this assignment (100 points) will be comprised of 3 parts (50 points from instructor grade, 30 points from peer review grade, 20 points for on-time submission of journal article choice).

Final Exam (closed book/proctored): There will be a closed-book, proctored cumulative final exam during the last week of the semester (see weekly course schedule), worth 160 points towards your final course grade. This exam will be administered through Canvas and students will take it online through HonorLock as described below:

Honorlock will proctor your exams this semester. Honorlock is an online proctoring service that allows you to take your exam from the comfort of your home. You DO NOT need to create an account, download software or schedule an appointment in advance. Honorlock is available 24/7 and all that is needed is a computer, a working webcam, an external side-view camera (more details will be provided on Canvas), and a stable Internet connection.

To get started, you will need Google Chrome and to download the Honorlock Chrome Extension. You can download the extension at www.honorlock.com/extension/install. When you are ready to test, log into the LMS, go to your course, and click on your exam. Clicking Launch Proctoring will begin the Honorlock authentication process, where you will take a picture of yourself, show your ID, and complete a scan of your room. Honorlock will be recording your exam session by webcam as well as recording your screen. Honorlock also has an integrity algorithm that can detect search-engine use, so please do not attempt to search for answers, even if it is on a secondary device. Good luck! Honorlock support is available 24/7/365. If you encounter any issues, you may contact us by live chat, phone (844-243-2500), and/or email (support@honorlock.com). If you encounter issues within the LMS, you may contact Your School’s Online Support Services team at their number.

Prior to the start of each exam, you will need the following:

- Government issued photo ID (or Student photo ID).
- Working camera and microphone.
- Stable internet connection.
- Google Chrome browser (https://chrome.com).
- During the test: The online testing environment should mimic the ‘in class’ testing environment, and has the
Testing Area:

- Sit at a clean desk or table (not on a bed or couch)
- Lighting in the room must be bright enough to be considered "daylight" quality. Overhead lighting is preferred; however, if overhead is not possible, the source of light should not be behind the student
- Ensure your desk or table is cleared of all other materials.

- Make sure your laptop is fully charged or keep the charger within arm’s reach. The following items/actions are not permitted:
  - No writing visible on desk or on walls.
  - No websites other than Canvas and the Honorlock proctoring extension should be used or open while taking a proctored exam.
  - Close all other programs and/or windows on the testing computer prior to logging into the proctored test environment.
  - Make sure music/televisions are not playing in the background.
  - Communication or receiving assistance from others is not permitted during a proctored assessment. Exceptions: contacting Honorlock support or your institution’s help desk.
  - No other persons except the test-taker should be in the room during testing.
  - Using a phone or any other electronic device, other than your test-taking device, is not permitted.
  - Remain visible in the web camera during the entire duration of the exam.
  - Leaving the room during the testing period is not permitted.
  - You must not take the computer into another room to finish testing.
  - Headphones or smart watches are not permitted.
  - Dual monitors are not permitted.

- Honorlock support: 1-(844) 243-2500

- The exam is designed to be completed in 75 minutes or less. However, the time-limit will be set at 100 minutes as a buffer in case of any unexpected technical difficulties with Honorlock.

- If you are unable to take an exam because of a technical glitch on your end (computer broken, poor internet connectivity), that is your responsibility and does not constitute an excused absence for an exam.

- For additional questions, please review the Honorlock Student Handout (available under Modules on Canvas course website).

- The dates and window for completing each exam is specified in the weekly course schedule (last page of syllabus).

- Make sure you sign-up for the correct exam course number – MCB5205 + your section number.

- The rules and format for each Exam will be reviewed prior to each exam period. Materials such as cell phones, scratch paper, books, notes, calculators, etc. are NEVER allowed during the exam.

- Exam videos will be reviewed by the course instructor and/or TA to verify that academic integrity of your exam has not been breached.

More information on UF grading policy may be found at:
UF Graduate Catalog
Grades and Grading Policies

**Students Requiring Accommodations**

Students with disabilities who experience learning barriers and would like to request academic accommodations should connect with the Disability Resource Center. It is important for students to share their accommodation letter with their instructor and discuss their access needs, as early as possible in the semester.

**Course Evaluation**

Students are expected to provide professional and respectful feedback on the quality of instruction in this course by completing course evaluations online via GatorEvals. Click here for guidance on how to give feedback in a professional and respectful manner. Students will be notified when the evaluation period opens, and can complete evaluations through the email they receive from GatorEvals, in their Canvas course menu under GatorEvals, or via ufl.bluera.com/ufl/. Summaries of course evaluation results are available to students here.

**University Honesty Policy**

UF students are bound by The Honor Pledge which states, "We, the members of the University of Florida community, pledge to hold ourselves and our peers to the highest standards of honor and integrity by abiding by the Honor Code. On all work submitted for credit by students at the University of Florida, the following pledge is either required or implied: “On my honor, I have neither given nor received unauthorized aid in doing this assignment.” The Honor Code specifies a number of behaviors that are in violation of this code and the possible sanctions. Furthermore, you are obligated to report any condition that facilitates academic misconduct to appropriate personnel. If you have any questions or concerns, please consult with the instructor or TAs in this class.

**Software Use**

All faculty, staff, and students of the University are required and expected to obey the laws and legal agreements governing software use. Failure to do so can lead to monetary damages and/or criminal penalties for the individual violator. Because such violations are also against University policies and rules, disciplinary action will be taken as appropriate. We, the members of the University of Florida community, pledge to uphold ourselves and our peers to the highest standards of honesty and integrity.

**Student Privacy**

There are federal laws protecting your privacy with regards to grades earned in courses and on individual assignments. For more information, please see the Notification to Students of FERPA Rights.
